\*Please note before pulling and sending injectors in to be tested make sure all of the following steps have been performed first. If we find nothing wrong with the testing of your injectors, there will be a \$60 test fee per injector collected prior to shipping back. Please check all of the following boxes to confirm all diagnostics have been performed. Injectors will not be accepted for testing without performing these steps first.

\_\_\_\_\_ I have verified the installation was properly performed. (Connector tubes are properly torqued and seated and not leaking, valve lash is within spec, no bent push tubes and the rocker arms are fully seated.

\_\_\_\_\_ CP3 Pump and FCA or regulator is operating properly.

\_\_\_\_\_ If your truck has aftermarket tuning, verify it was flashed and is working properly. Many times, we have tested injectors "as good" only to find the truck was not tuned as it should be. Speak with your tuner if needed.
